	ID-SCF	Mud Lick	Full Suppression	26 mi W of Salmon, ID	25	NEW	0%	7/16/21	Type 3 IC Brinkley	0	1	1	0	0	34	Air Attack SEATs	Fish habitat, mining and private lands
Ongoing Large Fires – Prioritized for Resource Commitment																	
	UT-SCS	Willow Creek	Full Suppression	10 mi E of Redmond, UT	48	+23	11%	7/11/21	Type 4 IC Glen Chappell	1	1	0	0	1	82	Maintain current resources	None
	NV-HTF	East Fork	Full Suppression	14 mi S of Gardnerville , NV	1,136	0	95%	7/11/21	Type 3 IC Danny Gallagher	2	1	0	2	1	151	Maintain current crew and aviation resources	Scossa Canyon dwellings and outbuildings
Ongoing Long Duration Fires – Not Being Prioritized for Resource Commitment																	
Notes of Significance *** Fires highlighted in yellow have submitted a FINAL ICS-209 or will no longer meet criteria to be prioritized																	
	ID-SCF	Fritzer (weekly update)	Monitor (25%) Full Suppression (75%)	15 mi NE of Salmon, ID	139	+2	75%	7/31/21	Type 5 IC Balliett	0	0	0	0	0	1	None	

Evening Brief

Date: July 8th, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 4	New Fires and Acres: 15 fires for 37.35 acres / 23 acres Large Fire Growth

Weather Summary:

... Gusty winds push East into Eastern Idaho, Western Wyoming & Northeastern Utah Friday ...

... Very HOT Temperatures through the Weekend into Next Week ...

... Isolated Dry Lightning through the weekend but Increasing Monsoon Moisture Early Next Week ...

Gusty winds are expected to develop again on Friday over Southern and Eastern Idaho, Wyoming into the northern half of Utah, though the strongest winds will be across the northeastern portion of the Great Basin. WNW wind gusts 35-45 mph are expected with RH 10-15%. NNE winds on the east side of the ridge will pick up somewhat over Central and Eastern Utah on Saturday, but wind gusts will likely remain 20-30 mph.

High pressure will remain in place into next week with continued very hot and dry conditions across the area, with temperatures peaking in most areas this weekend. Isolated dry lightning is expected over the southern third of the Great Basin and along parts of the Sierra Front on Friday. Coverage should remain isolated, but storms will likely be on the drier side with gusty outflow winds. There is less lightning potential over the weekend but can't rule out some storms with the strong heat.

Another surge of monsoon moisture is expected early next week with lightning increasing over the southern half of the Great Basin. Storms may start out drier, but moisture looks to push into the south as well. We will continue to monitor the potential for lightning and dry/wet potential.

Fuels/Fire Potential:

... Fuels and Fire Behavior Advisory in effect for Utah, the Arizona Strip and Southern/Eastern/Central Nevada ...

...Fire potential is on the increase regionwide this week due to continued hot and dry weather...

The continued warm and dry weather will cause fire danger values to increase once again to near the 90th -97th percentile over much of the Geographic Area this week. Wind this week and isolated lightning through Friday will further increase the likelihood of ignitions and spread. Another monsoon push occurs by early next week from the south bringing increased

lightning coverage to the southern half of the region which will increase ignition potential. Moisture looks to increase as well, and this will be monitored.

Resources:

Aviation within the Great Basin

- 0 VLAT, 2 LATs, 0 CL-415
- 25 SEATs, 2 FB, 11 AA, 0 ASM, 2 LP
- 1 HLCOs
- 10 Type 1 Helicopters / 9 Comm.
- 5 Type 2 Helicopters / 4 Comm.
- 19 Type 3 Helicopters / 12 Comm.

Crews Committed within the Great Basin

- 11 IHCs / 1 Available / 1 R&R
- 17 Type 2IA / 1 Available / 1 R&R
